### **DETAILED ACTION**

Applicant's amendments to the claims have been entered. Any rejection from the previous office action not addressed in the action below has been withdrawn.

#### ***Specification***

The amendment filed 04/21/2009 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the proposed new scheme at page 12 line 10.

Applicant is required to cancel the new matter in the reply to this Office Action.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-3,5-8,16-21,23-26 and 34-36 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement, this new rejection was necessitated by applicants amendments to the claims. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically independent

claims 1 and 19 show a new reaction product of a carboxylated PLA that is not supported in the original specification.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, these new rejections were necessitated by applicants amendments to the claims. Specifically within claims 1 and 19 the group R is not defined within the claims and neither is the integer n. In order to expedite the examination process the examiner considered R to include any conceivable linker for instance any conceivable alkyl or alkene chain or a covalent bond and n to include any integer.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,5-8,16-21, 23-26 and 34-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Yang et al. (US 6,258,121 B1, cited previously) and the teachings of Kim et al (US 5,548,035, cited previously) incorporated by reference, this new rejection was necessitated by applicants amendments to the claims.

Yang teaches a stent having a polymeric coating for controllably releasing an included active agent, the coating comprises polymeric materials and blends thereof selected from polymers such as polycaprolactone (PCL), polyhydroxybutyrate (PHB), poly(lactide-co-glycolide) and preferably PLA-PEO copolymer. See abstract, col 4 lin 4-22. Regarding the limitation within the claims on the structure of the carboxylated PLA, as noted by the examiner above R in the formula drawn in claims 1 and 19 is undefined, therefore the examiner treated R as any conceivable linking group. As a result of this interpretation R reads on a methylated methylene  $-\text{CH}(\text{CH}_3)-$  and applicants claimed formula reads on unmodified PLA. Regarding the limitation that the PLA-PEO copolymer is a triblock, Yang incorporates by reference the PLA-PEO copolymers of Kim et al (US 5,548,035) who teaches the use of PLA-PEO-PLA blocks. See col 5 lin 5-7.

### ***Conclusion***

No claims are allowed at this time.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
